

Ahmed A. Elkheshin
Full Stack Web Developer

E: ahmed.elkheshin@gmail.com | M: (571) 435-4658 | G: github.com/ahmedelk91 | W: ahmedelk91.github.io

Skills

- | | | |
|------------------------|----------------------|-----------------------|
| • HTML5 / CSS3 | • MongoDB / Mongoose | • React.js |
| • JavaScript / jQuery | • Express.js | • Amazon Web Services |
| • Ruby / Ruby on Rails | • AngularJS | • Git / Github |
| • SQL / PostgreSQL | • Node.js | • Bootstrap |

Relevant Experience

Consultant, Web Technician | UN/WHO/Pan-American Health Organization | Washington, DC | Nov 2016 – Present

- Assisted in the migration of over 45 bilingual websites from Joomla 1.5 to Joomla 3.0
- Responsible for maintenance and content updates of over 45 bilingual webpages using the Joomla CMS
- Utilize segmentation in Google Analytics to paint an accurate picture of web traffic and presence
- Create web ready images for site content via Adobe Photoshop

Web Development Immersive Student | General Assembly | Washington DC | June 2016 – Sept 2016

- Studied the fundamentals of full stack web development in an immersive and collaborative environment
- Implemented new languages, frameworks, and libraries on a weekly basis via homework, labs, and projects
- Followed industry trends to stay up-to-date with the newest and most popular frameworks
- Notable projects throughout the course and beyond:
 - [Simon Says](#): Everyone's favorite color-based memory game!
 - Built with: JavaScript, jQuery, and HTML5 / CSS3
 - Process: This was the result of my first two weeks of fundamental front-end development instruction. My goal was to recreate a classic with front-end technologies. I completed Simon Says in four days.
 - [Palories](#): A calorie counting app that utilizes a color-coded system to determine daily success.
 - Built with: Ruby on Rails, PostgreSQL, and Bootstrap
 - Process: I learned PostgreSQL and Ruby on Rails in one week. I wanted to use these skills to develop an app I personally wanted to use. I completed Palories in four days the following week.
 - [Newsly](#): A social media inspired news outlet for quick posting and thought sharing.
 - Built with: MongoDB, Express.js, AngularJS, Node.js, and Bootstrap
 - Process: As my first full stack application post graduation, this was the culmination of everything I learned over the course of the program. I wanted to simultaneously learn the MEAN Stack and build an application that mimicked social media news content sites like Reddit. I completed the MVP for Newsly in a little over seven days.

Recruiting Coordinator, Temporary Division | Careers in Nonprofits | Washington, DC | Jan 2016 – May 2016

- Provided client support and candidate management in a goal-oriented and fast-paced office setting
- Interviewed an average of 25 candidates from a variety of industries on a weekly basis
- Matched potential candidates with positions and missions they best identified with
- Utilized writing skills to compose attractive job descriptions for organizations looking to hire

Sales Support Specialist (contract position) | Jones Networking | Sterling, VA | June 2015 – Dec 2015

- Directly coordinated and supported the sales activities of three senior sales representatives
- Utilized Salesforce on a daily basis to track, analyze, and present sales numbers and figures
- Responsible for daily database management of over 1,000 products and customers

Education

August 2009 – May 2013 | University of Mary Washington | Fredericksburg, VA

Bachelor of Arts: International Relations (concentration on the Middle East and North Africa)

- Minor: Economics (coursework in development economics and econometrics)
- Presidential Diversity Scholarship recipient
